Re: Borosage v. Central Intelligence Agency,  
et al., U.S.D.C. D.D.C. Civil Action  
No. 75-0944

Dear Mr. Shattuck:

On November 18, 1975 the Senate Select Committee To Study Governmental Operations with Respect to Intelligence Activities published an interim report entitled "Alleged Assassination Plots Involving Foreign Leaders" (hereinafter referred to as the Committee Report). The Committee Report referenced a number of documents including many of the documents involved in the Borosage suit. In certain instances portions of these documents were directly quoted in the Committee Report. In other instances the contents of documents were described in substantial detail. In light of these disclosures, a review of the documents responsive to the Borosage suit was conducted by Eloise Page, Chief of the Operations Staff for the purpose of identifying for release those documents or portions of documents concerning matters disclosed in the Committee Report. That review has now been completed, and the results are presented below.

Documents or portions of documents which have been withheld have been determined to be currently properly classified and/or contain information pertaining to intelligence sources and methods

requiring continued protection. Specifically, information which continues to be withheld for the above-mentioned reasons has not been disclosed in the Committee Report. Consequently, material withheld is withheld pursuant to the authority of exemption (d)(1) of the Freedom of Information Act and/or exemption (b)(3) of the Act, based upon 50 U.S.C. 403(d)(3) or 403g.
